#### **Table of contents**

#### 1 Overview

#### 2 Description of the Biomass Producer and the Supply Base

- 2.1 Description of the company
- 2.2 Detailed description of the Supply Base
- 2.3 Feedstock information

#### 3 Supply Base Risk Assessments and Risk Management Measures

- 3.1 Summary of the Supply Base Evaluation
- 3.2 Conflicts with applicable national and sub-national legislation
- 3.3 Risk Management Measures

#### 4 Stakeholder engagement

- 4.1 General description
- 4.2 Response to stakeholder comments

#### 5 Report updates and approval

Annex 1: Detailed findings for Supply Base Evaluation indicators

**Annex 2: RED II Supply Base Evaluation** 

Annex 3: SBP Processing residues and/or Post-consumer feedstock requirements

Overview	
Producer name:	Koala Energy LTDA
Producer address:	ALBERTO FRANCISCO MULLER, 401, 89.295-000 RIO NEGRINHO, Brazil
SBP Certificate Code:	
Geographic position:	-26.242270, -49.479060
Primary contact:	IRUANA GRUBER, +55 47 98474-5793, iruana@koalaenergy.com.br
Company website:	
Date report finalised:	
SBR reporting period from:	01 Nov 2023
SBR reporting period to:	31 Oct 2024
Name of the Certification Body:	SCS Global Services
Certification Body Approval date:	
SBP Standard(s) used:	SBP Standard 2: Feedstock Verification v2.0, SBP Standard 4: Chain of Custody v2.0, SBP Standard 5: Collection and Communication of Data v2.0, Instruction Document 5E: Collection and Communication of Energy and Carbon Data v2.0
Feedstock origin (countries)	Brazil
Weblink to Standard(s) used:	https://sbp-cert.org/documents/standards-documents/standards

#### 2 Description of the Biomass Producer and the Supply Base

#### 2.1 Description of the company

Koala Energy started its activities in 2002, with the manufacturing of wooden frames to serve the North American market. Looking for innovation, technology and sustainability, the company decided to invest on the wood biomass business, starting the international market focused production in 2005.

Currently, the Koala Energy is expert on the wood Pellets production and also of equipments powered by this biofuel, such as heat exchangers and fireplaces. The international and nacional market are serviced by the company, highlighting the European.

The production is fully automated and the Koala Energy provides international quality machinery, adopting the stricter quality standards demanded by the international certifications.

The company is located in Rio Negrinho, Santa Catarina, and own a 35 000 m² factory for production, storage and logistics of the products.

Products included in the scope of SBP Certification: Pellets

Number of employees: 230

Annual maximum production capacity (metric tonnes): 100000

Number of direct feedstock suppliers: 2

Approximate number of feedstock sub-suppliers: 0

For each supplier, KOALA ENERGY take evidences, actions and procedures to show that feedstock received conforms with the SBP definitions of processing residues and / or postconsumer feedstock. The Organisation monitors the conformance of its suppliers with SBP definitions and purchase specifications and have a contingency plan to cater for non-compliant feedstock or documentation

Upon receipt, KOALA ENERGY has a visually inspection of all feedstock material and retain documentary evidence of the delivery and inspections carried out that confirmed that the feedstock complies with SBP definitions.

KOALA ENERGY has a supplier audit procedure with the relevant SBP requirements and, in cases where feedstock received does not comply with purchase specifications and / or the quantities stated on the invoices are incorrect, the Organisation take immediate corrective actions, that would be recorded and communicated to the Certification Body during the annual audit.

#### 2.2 Detailed description of the Supply Base

Guidance: Tables below have been generated automatically for each sourcing country based on the selection of 'Feedstock origin (countries)' in section 1 above.

Annex 1 is generated by the system if the SBP SBE is used without Regional Risk Assessment(s) (RRAs). In case RRA(s) is used, further details shall be given only in section 3 below.

Annex 2 is generated if RED II SBE is in the scope for each country separately.

Country	Brazil
Area/Region	State: Santa Catarina
Exclusions	No
Feedstock types	Processing residues
Feedstock Product Groups	Processing residues feedstock (4A)
Feedstock inputs	SBP Compliant feedstock
Is the forest managed to supply energy and non-energy markets?	Yes - Majority
For the forests in the Supply Base, is there an intention to retain, restock or encourage natural regeneration within 5 years of felling?	Yes - Majority
Risk assessment(s)	N/A – Only processing residues with SBP recognised claim

#### Provide a concise summary of why a SBE was determined to be required or not required here:

For all feedstock inputs, the confirmation of FSC® CoC certification is verified, ensuring receipt with certification and under the specified conditions for Pellet production. This process meets the requirements of the SBP standard 2.

Feedstock types included in SBE:	N/A
Includes RED II SBE:	No
Includes RED II TOF:	
Size of Supply Base area (million ha):	0.5000
Man(a) of the Cumply Page area	

#### Map(s) of the Supply Base area:

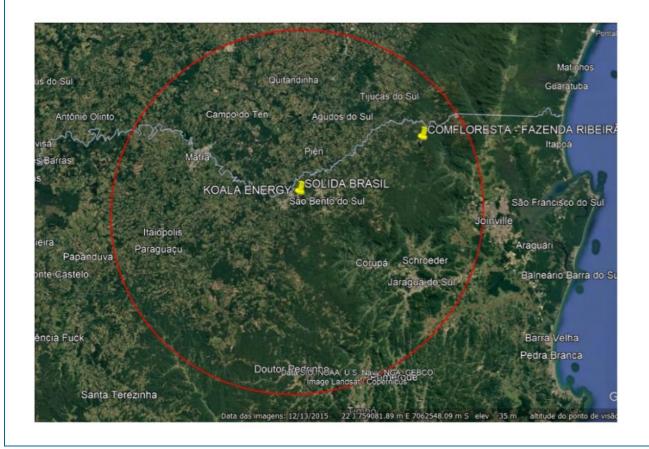

The supply base area to KOALA ENERGY currently includes suppliers within a 60 km radius of the factory, located in Rio Negrinho – SC. This applies to suppliers delivering 100% FSC-certified feedstock for the

production of KOALA pellets.

#### SUPPLY BASE MAP

(Mapa da Base de Fornecedores)

a. Total volume of Feedstock: 1-200,000 tonnes			
b. Volume of primary feedsto	<b>k:</b> 0		
c. List of all the species in pr	nary feedstock, including scientific name:		
Pinus taeda	Pinus		
Pinus elliottii	Pinus		
d. Was the feedstock used in salvage operation? N/A	he biomass removed from a forest as part of a pest/disease control measure of	or a	
Explanation:			
e. Hardwood (i.e. broadleaf to	es): specify proportion of feedstock from (%):		
f. Softwood (i.e. coniferous t	ees): specify proportion of feedstock from (%):		
g. Proportion of feedstock co	nposed of or derived from saw logs by weight (%):		
h. Indicate how you determin	the proportion of saw log:		
i. Roundwood from fellings (%):	om forests with > 40 yr rotation times - Average % volume of fellings delivered	l to B	
j. Select forest type(s) where	he primary feedstock was sourced from:		
k. Select the main harvesting	system(s) used for the sourced primary feedstock:		
I. Volume of primary feedsto	k from primary forest:		
m. Volume of processing re Physical form of the feeds	dues feedstock: 1-200,000 tonnes ock: Sawdust, Offcuts		
n. Share of SBP-recognised	stem claim for processing residues:		
100 % FSC			
o. Volume of post-consumer Physical form of the feeds			
p. Estimated amount of RED tonnes	compliant sustainable feedstock that could be collected annually by the BP: 1	00000	

Supply Base (estimated): N/A

Explanation:

### 3 Supply Base Risk Assessments and Risk Management Measures

Guidance: Biomass Producers shall demonstrate that any specified risks of sourcing feedstock not in compliance with SBP Standard 1 have been adequately reduced to low risk, following Standard 2 requirements. Following section applies to Biomass Producer's implementing SBP Supply Base Evaluation (SBP RRA or company own risk assessment). RED II Supply Base Evaluation details are reported in Annex 2.

- 3.1 Summary of the Supply Base Evaluation
- 3.2 Conflicts with applicable national and sub-national legislation
- 3.3 Risk Management Measures

Guidance: Please provide more details about specified risk indicators in each supply country and describe mitigation measures taken to address all specified risks associated with indicators.

#### 4 Stakeholder engagement

#### 4.1 General description

Biomass Producer's stakeholder engagement start date:

Biomass Producer's stakeholder engagement end date:

Total number of stakeholders contacted:

Give a general description of the process of Stakeholders Engagement, including stakeholders contacted, method of communication and a summary of the comments received:

4.2 Response to stakeholder comments

### 5 Report updates and approval

This document is: New Supply Base Report (Assessments/reassessments)

Summary of changes: N/A

### **Annex 1: Detailed findings for Supply Base Evaluation indicators**

### **Annex 2: RED II Supply Base Evaluation**

Not Applicable (RED II SBE not included)

## Annex 3: SBP Processing residues and/or Post-consumer feedstock requirements

☐ Not Applicable (Processing Residues and/or post-consumer feedstock not used)

#### Verification and monitoring of suppliers

For each supplier, KOALA ENERGY take evidences, actions and procedures to show that feedstock received conforms with the SBP definitions of processing residues and / or postconsumer feedstock. The Organisation monitors the conformance of its suppliers with SBP definitions and purchase specifications and have a contingency plan to cater for non-compliant feedstock or documentation

#### Feedstock inspection and classification upon receipt

For all processing residues received, Koala will maintain supporting documents of the delivery and the inspections carried out that confirm that the feedstock is in compliance with SBP definitions. These documents include transport documents and photos taken upon receipt to verify the characteristics of the residue.

These documents will contain, among other things: the name, type, and address of the supplier; a description of the feedstock category; the level of inspection control (photo); and a self-declaration that the feedstock qualifies as processing residues or post-consumer feedstock according to SBP requirements.

#### Supplier audit for processing residues and post-consumer feedstock

An annual **Audit** will be conducted **for all feedstock suppliers** in the production chain with SBP requirements to confirm compliance with residue requirements.

### Annex 4: RED II detailed findings for Trees Outside Forest (TOF) feedstock

NOTE: For "Trees outside forests (TOF) – Urban and landscape feedstock" no REDII sustainability requirements apply, only the GHG savings criteria apply (SBP REDII Bridging ID Section 4.2). The land use category in this case is neither forest land nor agricultural land. For "Trees outside forests (TOF) – Agricultural land feedstock" the applicable criteria are Article 29 paragraphs (2)-(5).

Not Applicable (RED II TOF not included)
